

Advances in Financial Machine Learning

MARCOS LÓPEZ DE PRADO

WILEY

Contents

About the Author	xxi
PREAMBLE	1
1 Financial Machine Learning as a Distinct Subject	3
1.1 Motivation, 3	
1.2 The Main Reason Financial Machine Learning Projects Usually Fail, 4	
1.2.1 The Sisyphus Paradigm, 4	
1.2.2 The Meta-Strategy Paradigm, 5	
1.3 Book Structure, 6	
1.3.1 Structure by Production Chain, 6	
1.3.2 Structure by Strategy Component, 9	
1.3.3 Structure by Common Pitfall, 12	
1.4 Target Audience, 12	
1.5 Requisites, 13	
1.6 FAQs, 14	
1.7 Acknowledgments, 18	
Exercises, 19	
References, 20	
Bibliography, 20	
PART 1 DATA ANALYSIS	21
2 Financial Data Structures	23
2.1 Motivation, 23	

- 2.2 Essential Types of Financial Data, 23
 - 2.2.1 Fundamental Data, 23
 - 2.2.2 Market Data, 24
 - 2.2.3 Analytics, 25
 - 2.2.4 Alternative Data, 25
- 2.3 Bars, 25
 - 2.3.1 Standard Bars, 26
 - 2.3.2 Information-Driven Bars, 29
- 2.4 Dealing with Multi-Product Series, 32
 - 2.4.1 The ETF Trick, 33
 - 2.4.2 PCA Weights, 35
 - 2.4.3 Single Future Roll, 36
- 2.5 Sampling Features, 38
 - 2.5.1 Sampling for Reduction, 38
 - 2.5.2 Event-Based Sampling, 38
- Exercises, 40
- References, 41

3 Labeling

43

- 3.1 Motivation, 43
- 3.2 The Fixed-Time Horizon Method, 43
- 3.3 Computing Dynamic Thresholds, 44
- 3.4 The Triple-Barrier Method, 45
- 3.5 Learning Side and Size, 48
- 3.6 Meta-Labeling, 50
- 3.7 How to Use Meta-Labeling, 51
- 3.8 The Quantamental Way, 53
- 3.9 Dropping Unnecessary Labels, 54
- Exercises, 55
- Bibliography, 56

4 Sample Weights

59

- 4.1 Motivation, 59
- 4.2 Overlapping Outcomes, 59
- 4.3 Number of Concurrent Labels, 60
- 4.4 Average Uniqueness of a Label, 61
- 4.5 Bagging Classifiers and Uniqueness, 62
 - 4.5.1 Sequential Bootstrap, 63
 - 4.5.2 Implementation of Sequential Bootstrap, 64

- 4.5.3 A Numerical Example, 65
- 4.5.4 Monte Carlo Experiments, 66
- 4.6 Return Attribution, 68
- 4.7 Time Decay, 70
- 4.8 Class Weights, 71
- Exercises, 72
- References, 73
- Bibliography, 73

5 Fractionally Differentiated Features

75

- 5.1 Motivation, 75
- 5.2 The Stationarity vs. Memory Dilemma, 75
- 5.3 Literature Review, 76
- 5.4 The Method, 77
 - 5.4.1 Long Memory, 77
 - 5.4.2 Iterative Estimation, 78
 - 5.4.3 Convergence, 80
- 5.5 Implementation, 80
 - 5.5.1 Expanding Window, 80
 - 5.5.2 Fixed-Width Window Fracdiff, 82
- 5.6 Stationarity with Maximum Memory Preservation, 84
- 5.7 Conclusion, 88
- Exercises, 88
- References, 89
- Bibliography, 89

PART 2 MODELLING

91

6 Ensemble Methods

93

- 6.1 Motivation, 93
- 6.2 The Three Sources of Errors, 93
- 6.3 Bootstrap Aggregation, 94
 - 6.3.1 Variance Reduction, 94
 - 6.3.2 Improved Accuracy, 96
 - 6.3.3 Observation Redundancy, 97
- 6.4 Random Forest, 98
- 6.5 Boosting, 99

6.6	Bagging vs. Boosting in Finance, 100	
6.7	Bagging for Scalability, 101	
	Exercises, 101	
	References, 102	
	Bibliography, 102	
7	Cross-Validation in Finance	103
7.1	Motivation, 103	
7.2	The Goal of Cross-Validation, 103	
7.3	Why K-Fold CV Fails in Finance, 104	
7.4	A Solution: Purged K-Fold CV, 105	
7.4.1	Purging the Training Set, 105	
7.4.2	Embargo, 107	
7.4.3	The Purged K-Fold Class, 108	
7.5	Bugs in Sklearn's Cross-Validation, 109	
	Exercises, 110	
	Bibliography, 111	
8	Feature Importance	113
8.1	Motivation, 113	
8.2	The Importance of Feature Importance, 113	
8.3	Feature Importance with Substitution Effects, 114	
8.3.1	Mean Decrease Impurity, 114	
8.3.2	Mean Decrease Accuracy, 116	
8.4	Feature Importance without Substitution Effects, 117	
8.4.1	Single Feature Importance, 117	
8.4.2	Orthogonal Features, 118	
8.5	Parallelized vs. Stacked Feature Importance, 121	
8.6	Experiments with Synthetic Data, 122	
	Exercises, 127	
	References, 127	
9	Hyper-Parameter Tuning with Cross-Validation	129
9.1	Motivation, 129	
9.2	Grid Search Cross-Validation, 129	
9.3	Randomized Search Cross-Validation, 131	
9.3.1	Log-Uniform Distribution, 132	
9.4	Scoring and Hyper-parameter Tuning, 134	

Exercises, 135
References, 136
Bibliography, 137

PART 3 BACKTESTING 139

10 Bet Sizing 141

10.1 Motivation, 141
10.2 Strategy-Independent Bet Sizing Approaches, 141
10.3 Bet Sizing from Predicted Probabilities, 142
10.4 Averaging Active Bets, 144
10.5 Size Discretization, 144
10.6 Dynamic Bet Sizes and Limit Prices, 145
Exercises, 148
References, 149
Bibliography, 149

11 The Dangers of Backtesting 151

11.1 Motivation, 151
11.2 Mission Impossible: The Flawless Backtest, 151
11.3 Even If Your Backtest Is Flawless, It Is Probably Wrong, 152
11.4 Backtesting Is Not a Research Tool, 153
11.5 A Few General Recommendations, 153
11.6 Strategy Selection, 155
Exercises, 158
References, 158
Bibliography, 159

12 Backtesting through Cross-Validation 161

12.1 Motivation, 161
12.2 The Walk-Forward Method, 161
12.2.1 Pitfalls of the Walk-Forward Method, 162
12.3 The Cross-Validation Method, 162
12.4 The Combinatorial Purged Cross-Validation Method, 163
12.4.1 Combinatorial Splits, 164
12.4.2 The Combinatorial Purged Cross-Validation Backtesting Algorithm, 165
12.4.3 A Few Examples, 165

12.5 How Combinatorial Purged Cross-Validation Addresses Backtest Overfitting, 166

Exercises, 167

References, 168

13 Backtesting on Synthetic Data

169

13.1 Motivation, 169

13.2 Trading Rules, 169

13.3 The Problem, 170

13.4 Our Framework, 172

13.5 Numerical Determination of Optimal Trading Rules, 173

13.5.1 The Algorithm, 173

13.5.2 Implementation, 174

13.6 Experimental Results, 176

13.6.1 Cases with Zero Long-Run Equilibrium, 177

13.6.2 Cases with Positive Long-Run Equilibrium, 180

13.6.3 Cases with Negative Long-Run Equilibrium, 182

13.7 Conclusion, 192

Exercises, 192

References, 193

14 Backtest Statistics

195

14.1 Motivation, 195

14.2 Types of Backtest Statistics, 195

14.3 General Characteristics, 196

14.4 Performance, 198

14.4.1 Time-Weighted Rate of Return, 198

14.5 Runs, 199

14.5.1 Returns Concentration, 199

14.5.2 Drawdown and Time under Water, 201

14.5.3 Runs Statistics for Performance Evaluation, 201

14.6 Implementation Shortfall, 202

14.7 Efficiency, 203

14.7.1 The Sharpe Ratio, 203

14.7.2 The Probabilistic Sharpe Ratio, 203

14.7.3 The Deflated Sharpe Ratio, 204

14.7.4 Efficiency Statistics, 205

14.8 Classification Scores, 206

14.9 Attribution, 207

Exercises, 208
References, 209
Bibliography, 209

15 Understanding Strategy Risk 211

15.1 Motivation, 211
15.2 Symmetric Payouts, 211
15.3 Asymmetric Payouts, 213
15.4 The Probability of Strategy Failure, 216
 15.4.1 Algorithm, 217
 15.4.2 Implementation, 217
Exercises, 219
References, 220

16 Machine Learning Asset Allocation 221

16.1 Motivation, 221
16.2 The Problem with Convex Portfolio Optimization, 221
16.3 Markowitz's Curse, 222
16.4 From Geometric to Hierarchical Relationships, 223
 16.4.1 Tree Clustering, 224
 16.4.2 Quasi-Diagonalization, 229
 16.4.3 Recursive Bisection, 229
16.5 A Numerical Example, 231
16.6 Out-of-Sample Monte Carlo Simulations, 234
16.7 Further Research, 236
16.8 Conclusion, 238
Appendices, 239
 16.A.1 Correlation-based Metric, 239
 16.A.2 Inverse Variance Allocation, 239
 16.A.3 Reproducing the Numerical Example, 240
 16.A.4 Reproducing the Monte Carlo Experiment, 242
Exercises, 244
References, 245

PART 4 USEFUL FINANCIAL FEATURES 247

17 Structural Breaks 249

17.1 Motivation, 249
17.2 Types of Structural Break Tests, 249

- 17.3 CUSUM Tests, 250
 - 17.3.1 Brown-Durbin-Evans CUSUM Test on Recursive Residuals, 250
 - 17.3.2 Chu-Stinchcombe-White CUSUM Test on Levels, 251
- 17.4 Explosiveness Tests, 251
 - 17.4.1 Chow-Type Dickey-Fuller Test, 251
 - 17.4.2 Supremum Augmented Dickey-Fuller, 252
 - 17.4.3 Sub- and Super-Martingale Tests, 259
- Exercises, 261
- References, 261

18 Entropy Features

263

- 18.1 Motivation, 263
- 18.2 Shannon's Entropy, 263
- 18.3 The Plug-in (or Maximum Likelihood) Estimator, 264
- 18.4 Lempel-Ziv Estimators, 265
- 18.5 Encoding Schemes, 269
 - 18.5.1 Binary Encoding, 270
 - 18.5.2 Quantile Encoding, 270
 - 18.5.3 Sigma Encoding, 270
- 18.6 Entropy of a Gaussian Process, 271
- 18.7 Entropy and the Generalized Mean, 271
- 18.8 A Few Financial Applications of Entropy, 275
 - 18.8.1 Market Efficiency, 275
 - 18.8.2 Maximum Entropy Generation, 275
 - 18.8.3 Portfolio Concentration, 275
 - 18.8.4 Market Microstructure, 276
- Exercises, 277
- References, 278
- Bibliography, 279

19 Microstructural Features

281

- 19.1 Motivation, 281
- 19.2 Review of the Literature, 281
- 19.3 First Generation: Price Sequences, 282
 - 19.3.1 The Tick Rule, 282
 - 19.3.2 The Roll Model, 282

19.3.3	High-Low Volatility Estimator, 283
19.3.4	Corwin and Schultz, 284
19.4	Second Generation: Strategic Trade Models, 286
19.4.1	Kyle's Lambda, 286
19.4.2	Amihud's Lambda, 288
19.4.3	Hasbrouck's Lambda, 289
19.5	Third Generation: Sequential Trade Models, 290
19.5.1	Probability of Information-based Trading, 290
19.5.2	Volume-Synchronized Probability of Informed Trading, 292
19.6	Additional Features from Microstructural Datasets, 293
19.6.1	Distribution of Order Sizes, 293
19.6.2	Cancellation Rates, Limit Orders, Market Orders, 293
19.6.3	Time-Weighted Average Price Execution Algorithms, 294
19.6.4	Options Markets, 295
19.6.5	Serial Correlation of Signed Order Flow, 295
19.7	What Is Microstructural Information?, 295
	Exercises, 296
	References, 298

PART 5 HIGH-PERFORMANCE COMPUTING RECIPES 301

20 Multiprocessing and Vectorization 303

20.1	Motivation, 303
20.2	Vectorization Example, 303
20.3	Single-Thread vs. Multithreading vs. Multiprocessing, 304
20.4	Atoms and Molecules, 306
20.4.1	Linear Partitions, 306
20.4.2	Two-Nested Loops Partitions, 307
20.5	Multiprocessing Engines, 309
20.5.1	Preparing the Jobs, 309
20.5.2	Asynchronous Calls, 311
20.5.3	Unwrapping the Callback, 312
20.5.4	Pickle/Unpickle Objects, 313
20.5.5	Output Reduction, 313
20.6	Multiprocessing Example, 315
	Exercises, 316

Reference, 317
Bibliography, 317

21 Brute Force and Quantum Computers 319

- 21.1 Motivation, 319
- 21.2 Combinatorial Optimization, 319
- 21.3 The Objective Function, 320
- 21.4 The Problem, 321
- 21.5 An Integer Optimization Approach, 321
 - 21.5.1 Pigeonhole Partitions, 321
 - 21.5.2 Feasible Static Solutions, 323
 - 21.5.3 Evaluating Trajectories, 323
- 21.6 A Numerical Example, 325
 - 21.6.1 Random Matrices, 325
 - 21.6.2 Static Solution, 326
 - 21.6.3 Dynamic Solution, 327

Exercises, 327

References, 328

22 High-Performance Computational Intelligence and Forecasting Technologies 329

Kesheng Wu and Horst D. Simon

- 22.1 Motivation, 329
- 22.2 Regulatory Response to the Flash Crash of 2010, 329
- 22.3 Background, 330
- 22.4 HPC Hardware, 331
- 22.5 HPC Software, 335
 - 22.5.1 Message Passing Interface, 335
 - 22.5.2 Hierarchical Data Format 5, 336
 - 22.5.3 *In Situ* Processing, 336
 - 22.5.4 Convergence, 337
- 22.6 Use Cases, 337
 - 22.6.1 Supernova Hunting, 337
 - 22.6.2 Blobs in Fusion Plasma, 338
 - 22.6.3 Intraday Peak Electricity Usage, 340
 - 22.6.4 The Flash Crash of 2010, 341
 - 22.6.5 Volume-synchronized Probability of Informed Trading Calibration, 346

22.6.6 Revealing High Frequency Events with Non-uniform
 Fast Fourier Transform, 347

22.7 Summary and Call for Participation, 349

22.8 Acknowledgments, 350

References, 350
